What to do if you see a downed power line

What to do if you see a downed power line

Never, ever touch a downed power line or go near one. Power lines are not insulated like power cords. Always assume the power line is live.

- 1 Don't touch a fallen power line or anything touching the wire.
- 2 Do not touch anything or anyone in contact with a fallen power line or other equipment.
- 3 Keep children and pets away from fallen electric wires.
- 4 Do not drive over a fallen power line.
- 5 Call 911 immediately to report a fallen power line.

STORM SURVIVAL STORE

What to do if a power line touches your car

If your vehicle comes in contact with a downed power line

- 1 Stay inside! The safest place is in your car. The ground around your car may be energized.
- 2 Honk the horn, roll down your window and yell for help.
- 3 Warn others to stay away. Anyone who touches the equipment or ground around the vehicle may be injured.
- 4 Use your mobile phone to call 911.
- 5 Fire department, police and PG&E workers will tell you when it is safe to get out of the vehicle.

If there is a fire and you have to exit a vehicle that has come in contact with downed power lines

- 1 Remove loose items of clothing.
- 2 Keep your hands at your sides and jump clear of the vehicle, so you are not touching the car when your feet hit the ground.
- 3 Keep both feet close together and shuffle away from the vehicle without picking up your feet.
